SYNONYMS

SYNONYMS are words that express different shades of a common meaning. No two words in the English language express identically the same meaning, and even when two words make their way independently of one another into the language to express the same idea, the tendency is in time to mark a difference in their meaning. For instance, before the Norman Conquest, the ordinary name for the third season, that which comes between summer and winter, was "haerfest," but when the Normans came with the French language to England, they brought with them the word "autumn" to denote the same season. In the case of the other seasons, the English words finally ousted the French, so that we speak to-day as did our Anglo-Saxon forefathers, of spring, summer, and winter, but for the third season the two names "haerfest" and "autumn" held on side by side. It became a nuisance that this one season should have two names, and so, in the course of time, the English "haerfest" resigned

its right as the name of a season to the French "autumn" and took upon itself the name of the chief event of autumn, the ingathering of fruit and crops, or the "harvest." Again take the English word "body" and compare it with the French word "corps." In their own languages these two words have the same range of meaning, but directly that the French "corps" is adopted by the English into their language in the form of "corse" or "corpse," its meaning is restricted; it is applied now only to *dead* bodies, and even in that sense it was further restricted to the dead bodies of human beings, as, for the dead bodies of animal creation in general, we discovered the word "carcase." Nor was this the end of "corps" in English; in recent times it was once more taken into the language, this time with the restricted meaning of a military body of men.

The English language, like all other languages, is a harmony wherein word and meaning are perpetually ringing the changes on one another. How many meanings may the simple word "sad" have for us? It summons up visions of "sorrow," "gloom," "tragedy," "despair," or perhaps only of sober colouring. Again through all the words "charity," "friendship," "affection," "passion," "tenderness," "devotion," "amours,"

“lust,” there quivers the one meaning of “love.” The key of this wide harmony is, that each word in the language has one fundamental meaning that cannot be expressed so well by any other word. Mere ephemeral writers have found in synonyms only a means to disguise their one poor thought in a dozen inadequate words; a means, in short, towards that most loathsome of literary vices, “elegant variety.” But the secret of great writing is to know one’s own thought and to find the right and only word wherewith to express it. Sometimes this art is attained simply by instinct, as, for instance, when Herrick wrote—

“Bid me to live, and I will live
Thy *Protestant* to be.”

In these lines “Protestant” is used in a sense that it never had before and has never had since, and yet what other word could we look for from the context and the rhythm? But to take an instance in which the rhythm of the sentence helps us less towards the discovery of the right word. Charles Dickens describes two gentlemen as speaking, after a funeral, of the dead man “as though they themselves were *notoriously* immortal.” No other word in the context would have so happy, and at the same time so humorous an effect as the adverb “*notoriously*” before “immortal.”

At other times we feel a sense of intellectual effort in the writer, something of Landor's "morose and difficult attempts to find the word to fit the thing." Gray's "Elegy in a Country Churchyard" was the work of years of polishing and refinement, and in the very opening stanzas we are dimly aware of all this patient toil.

"The curfew tolls the knell of parting day,
The lowing herd wind slowly o'er the lea,
The plowman homeward plods his weary way,
And leaves the world to darkness and to me.

Now fades the glimmering landscape on the sight,
And all the air a solemn stillness holds,
Save where the beetle wheels his droning flight
And drowsy tinklings lull the distant folds."

In these few lines we have pictured a scene that is known to us all and often but little noticed, and its calm beauty is brought more closely home to us by the poet's careful choice of words. If we disturb his choice and seek to draw the same picture by an adroit substitution of synonymous expressions, all the beauty goes out of it. For instance, another poet might have written—

"Funereal curfew clangs the Sun's demise,
The mooing kine o'er fields sweep tardily,
And home the worn-out yokel trudging hies,
Relinquishing the earth to mirk and me.

The misty view dissolves now on my gaze,
And all the atmosphere stern calm doth keep,
Except where yonder insect buzzing strays,
And somnolent janglings soothe the far-off sheep."

The pictures drawn are fundamentally the same, but the first with its soft distant sounds is far more true to the feeling that twilight brings than the second with its crude "stern calm," its "funereal clangour," and its "somnolent janglings."

But we need not examine words in their context and substitute others for them to discover their fundamental difference. In everyday conversation we speak of a man as being "rich" or "wealthy," and no doubt think that we mean the same by both words. But when we place them apart from all context, side by side, we find that each word produces an impression of its own upon us. A man may be "rich" without our knowing it, but a man cannot be "wealthy" without our knowing it. "Scrooge," says Dickens, "was rich and miserly"; here "rich" seems almost an unneeded complement to "miserly," as misers are usually held to be rich, but to say that Scrooge was "wealthy and miserly" seems a contradiction in terms. In short, "rich" denotes the mere possession of money or property, "wealthy" denotes the evidences of it in the life and outward circumstances of the possessor. Furthermore, when we examine into the uses of "rich" and "wealthy," we find that "rich" is capable of a far more extended meaning

than "wealthy." It may be applied to persons or things or abstractions ("rich men," "rich food," "rich ornamentation"); it may be further qualified by stating that in which a person or thing is "rich" ("rich in lands," "rich in suggestions," "rich in possibilities"); and lastly, it may denote more than the possession of mere money or property. "Wealthy," on the other hand, is applied only to persons possessed of money or property in abundance, and therefore it need never be further qualified.

We have discussed the nature of synonyms and shown how each one of them has a certain meaning of its own that another cannot express: let us now study the history of their development. They make their way into a language in two ways—

- (1) Through the need for variety of expression that comes upon a people as soon as education has widened their outlook and at the same time sharpened their perceptive faculties.
- (2) Through the incursion of foreign words into the vocabulary.

The desire for variety of expression shows itself, in the earlier stages of a language, in three manners:

(a) Words widen their meaning.

In the beginning, each sound or word was called into being to embody one specific meaning, but as time went on, men perceived that all meanings overlapped into another, and so the words that expressed them overlapped into one another. For instance, in the very early days of the English language, a "dumb" man meant originally a "stupid" man. Gradually, however, among the English people, the "dumb" man came to mean the man who never opened his lips in the popular councils, and then the man who, by nature, was without the faculty of speech. Finally, the old meaning of "stupidity" passed away, and the word went on still widening its meaning. To-day the "dumb" man may be the "silent" man, who does not speak by choice or habit rather than through impotence, or he may be the "uncomplaining" man, who does not speak, though he has every inducement thereto. But the sense of "dumbness" flows on through other words, and finally loses itself in some other meaning, as, for instance, in the series, "dumb," "silent," "quiet," "calm," "unruffled," "indifferent," "callous," "cruel," and so we perceive that out of an old word that originally denoted "stupidity" we can derive meanings of "silence," "calm-

ness," "indifference," and "cruelty," or of "patience," "forbearance," and "forgiveness."

(b) By analogy, or resemblance of function, words often obtain a sense not inherent in their fundamental meaning.

The central point of any body is called the "middle"; the central point of the human frame is by some held to be the "heart," and therefore we often write "in the heart of England" when we mean "in the middle of England." Again, "brightness" is the quality of shining physically, "intelligence" the quality of shining intellectually, therefore "brightness" and "intelligence" may be used as synonyms.¹ It only remains to be said that this formation of synonyms by analogy is a device more commonly employed by the English mind than by the minds of other nations.

¹ It is interesting to note how two words, derived from one Indo-European word, may alter in meaning in different languages, and then come together as synonyms in a single language. For instance, English "head" and Latin "caput," which both denote the uppermost portion of the human body, are both derived from a common Indo-European root. "Head" still retains its primitive meaning in English, but "caput," altered in French to "chef," has made its way into English as "chief," with the meaning of "the head, *e.g.*, of an army." The entry of "chief" into our language at once widened the meaning of "head," and to-day we may write as we please of the "head" or "chief" of an army, and habitually do write "headmaster" instead of "chiefmaster."

- (c) By association, or connection of meaning, words obtain a sense not inherent in their fundamental meaning.

For instance, the "king" wears a "crown," and sits upon a "throne" in the popular imagination, therefore we speak of "loyalty to the crown" or "loyalty to the throne," when we mean "loyalty to the king." Lothario is the seducer of Calista in Nicholas Rowe's play, "The Fair Penitent," and therefore we speak of "a gay Lothario" when we mean "a gay libertine." As a last instance, a ghoul was in Eastern myth a demon that battened upon corpses, and therefore to-day we may describe a "morbid" man, or one who delights in horrible things, as a "ghoul" or a "ghoulish" man. This formation of synonyms by association is growing more common in modern English literature owing to the influence of popular journalism.¹

¹ By dwelling upon the associations of a word, the English people have sometimes completely lost its original meaning, which is often more closely retained in Modern German.

Cf. Mod. H.G. <i>Deutsch</i> =German	Mod. E. <i>Dutch</i> =Hollander.
„ <i>glatt</i> =smooth	„ <i>glad</i> =joyful
„ <i>satt</i> =sated	„ <i>sad</i> =sorrowful
„ <i>selig</i> =happy	„ <i>silly</i> =foolish.

But in "clean" and "foul," English has kept the old meaning, where German has changed it in "klein" (=small), and "faul" (=lazy). Again, such words as "shrew" and "gossips" meant once respectively "a mouse with a venomous bite," and "those who were sib or akin in God," i.e. godparents. But to-day a "shrew" is a woman with a venomous tongue, while, by association with the garrulity of christening parties, "gossips" have become empty chatterers.

The desire for variety of expression is the first cause of synonyms, and the second, the incursion of foreign words into a language, is often only the outcome of this same desire. For instance we have the good English word "knowledge," but to express certain forms of it we have borrowed from Latin "science," and from Greek "philosophy." But in English, more than any other language, this penetration of foreign words into the vocabulary is due as much to an accident as to the need for variety. This accident was the Norman Conquest of 1066; before that date the vocabulary was almost entirely Teutonic in character, but after 1066 it was enriched, against its will, by an entirely new set of words, derived mainly from a Latin source, which expressed not so much new thoughts as new ways of looking at things. After the Conquest came the Renaissance, and after the Renaissance the growth of science in the nineteenth century, in both of which periods scholars and inventors deliberately borrowed words from Greek and Latin wherewith to express their new ideas clearly and succinctly.

Thanks to this lucky accident of the Norman Conquest, modern English is richer in synonyms, and therefore far more capable of expressing different shades of meaning than

any other language in Europe. Above all, it is able to mark the difference between the emotional and the intellectual point of view. Take for instance the words "motherhood," "fatherly," "manly," and compare them with their French-formed synonyms, "maternity," "paternal," "parental," "male," "masculine." The English words express a wider, more indefinite, more emotional meaning—"motherhood," all the highest attributes of a mother; "fatherly," the kindness of a father; "manly," the highest attributes of a man. But their French-formed synonyms have distinctly a more artificial and even technical meaning: "maternity" refers more exclusively to childbirth; we speak of a "maternity" home where we would not speak of a "motherhood" home; "paternal" and "parental," again, have sometimes no more than a legal significance; we speak of the "paternal acres," but never of the "fatherly acres"; "male" really means nothing more than the opposite of "female"; "masculine" denotes only the possession of the attributes of a certain sex; we speak of "masculine women," but not of "manly women"; sometimes it denotes only a grammatical gender.

Besides a more emotional sense than their synonyms from French and Latin, native

English words have often a wider range of meaning. Such words as "passion," "affection," "devotion," "tenderness," "desire," "amorousness," "amours," which are clearly distinguished from one another in meaning, all merge into the common idea of "love"; "scholarship," "science," "philosophy," are but so many offshoots of the meaning of the words "learning" or "knowledge." In the same way, among the verbs, the word for the simple action will be found usually among the native verbs, as often as not among the oldest of all our words, the Strong Verbs. In the verbs brought into the language by the Normans, the meaning is sensibly narrowed, while the verbs of learned formation from Greek and Latin have usually some technical, and often one single, association.

Cf. English, *kill, slay, slaughter.*

French, *assassinate, massacre.*

Learned Latin, *decimate* (*i.e.* to kill one man in ten).

There is one fallacy in the use of Synonyms that should be noticed here. Of late years, there has been a tendency among English prose-writers obstinately to prefer the native or "Saxon" word (as it has unwisely been called) to its synonym of French or Latin origin. In conception this practice is worthy of all praise; it leads to purity of language, and also to clearness of thinking,

for a native word cannot fail to convey more meaning to the vast majority of English readers than a word of unknown ingredients from a foreign tongue. One benefit that it has conferred upon the language is found in the word "folk-lore," as the name for our country-side legends, in place of the clumsy and meaningless expression "popular mythology." But the practice may be, and in fact has been, carried to ridiculous excess. William Barnes, the Dorsetshire poet, wished to banish all foreign words such as "astronomer" or "omnibus" from the language, and to replace them by native words such as "starconner" and "folk-wain." But words, like men, soon gain individuality : as "omnibus" is nowadays associated with its driver and conductor, and city clerks and shop girls going to business ; so a "folk-wain" seems to us to convey the picture of a bevy of chattering farmers' wives going to market. To cling in this pedantic fashion to native roots is to rob English of its admitted superiority over other languages, only to gain a certain vague quaintness of expression. Why should we, for instance, be reduced to speaking, like the Germans, of the "manly sex" of a noun or adjective, when we have the words "masculine gender" wherewith to distinguish mere grammatical peculiarity

from human personality? Some enthusiasts have even gone so far as to write "foreword" for "preface" at the beginning of their books. "Preface" quite adequately expressed the idea which they wished to convey, and to write "foreword" is a piece of mere sentimental perversity. When we have already in our vocabulary one good word, there is no need to evolve for it a needless synonym. When, however, we have not a word "to fit the thing" in the language, then, if the idea that we would express is purely intellectual, it is, on the whole, best to form a word from Greek or Latin sources, such as "epidemic" or "rationalism," as conveying the meaning most precisely to educated men; if, on the other hand, the idea is emotional or poetical, then we may form a word from native sources, such as "home-sick," "one-sided," "star-inwoven" (of night, in Shelley), as conveying most to the primitive man. In any case, whether in using synonyms already in the language or in forming new ones, our constant endeavour should be, both for the sake of purity of language and of clearness of thought, honestly and diligently to employ "the right word in the right place."

The synonyms in the following Dictionary have been grouped, for the most part, under

the words that have the widest range of meaning—*i.e.* for synonyms of “murder” the reader must look under “kill.” In the case of words under which the synonyms are grouped, the derivation is given in order to show the fundamental meaning of the word, and the synonyms are arranged in such an order as to show, as far as possible, the gradual development of the word from its fundamental meaning. When the word takes on an entirely new meaning, the first of the synonyms for this new meaning are printed in italics. The synonyms are also arranged under two main headings—(1) those that we owe to Anglo-Saxons and Scandinavians, and also to foreign Teutonic nations, in which latter case the language is specified in brackets; (2) those that have come into the language through the medium of French and Latin: when the word was not originally of French or some other Latin source, the language is specified in brackets.

A DICTIONARY OF SYNONYMS

Aba

Abandon, *v.* leave.

Abate (M.E. *abaten*; O.F. *abatre*; Lat. *abbattere* = to beat down, —*ad* = to, and *battere* (*batuere*) = to beat).

T. *lower*, *lessen*, *allay*, *soothe*, *still*, *soften*.

L. *reduce*, *relax*, *remit*, *mitigate*, *extenuate*, *diminish*, *curtail*, *contract*, *restrict*, *abridge*, *intermit*, *liquidate*, *subside*, *ease*, *assuage*, *calm*, *appease*.

Abbreviate, *v.* abridge.

Abhor, *v.* hate.

Abide, *v.* wait.

Abide, *v.* suffer, bear.

Ability (O.F. *habilité*; Lat. *habilitatem*, acc. of *habilitas*, from *habilis* = skilful), *v.* able.

T. *skill*, *skilfulness*, *cleverness*.

L. *talent* (Gk.), *tact*, *aptitude*, *aptness*, *address*, *capacity*, *power*, *capability*, *competence*, *efficiency*, *sufficiency*, *effect*, *effectiveness*.

Able (M.E. *able*, *hable* = skilful, from Lat. *habilis* = lit. haveable, from *habere* = to have).

T. *skilful*, *clever*, *fit*, *fitted*, *gifted*, *strong*.

L. *talented* (Gk.), *competent*, *equal* (to), *adequate*, *efficient*, *sufficient*, *capable*, *powerful*, *effective*.

Abridge (O.F. *abregier*, *abreger*;

Abu

M.E. *abreggen*, from Lat. *abbreviāre*, —*ad* = to + *brevis* = short).

T. *shorten*, *cut short*, *dock*, *lessen*, *take in*.

L. *curtail*, *prune*, *compress*, *diminish*, *reduce*, *abbreviate*, *condense*, *summarise*, *contract*, *retrench*.

Gk. *epitomise*.

Absent (F. *absent*; Lat. *absentem*, acc. of *absens*, —*ab*(s) = from + *ens* = being).

T. *away*, *out*, *elsewhere*, *afar*, *lost*, *missing*, *wanting*, *lacking*, *heedless*, *unthinking*, *thoughtless*, *dreamy*.

L. *inattentive*, *distracted*, *abstracted*, *absorbed*, *preoccupied*, *engrossed*, *vacant*.

Absolute (O.F. and M.E. *absolut*; Lat. *absolutus* = freed from, —*ab* = from + *solvere* = to loose).

T. *free*, *boundless*, *unbounded*.

L. *uncontrolled*, *unrestrained*, *unlimited*, *unconditional*, *unrestricted*, *despotic* (Gk.), *tyrannical* (Gk.), *peremptory*, *arbitrary*, *unequivocal*, *positive*, *definite*, *certain*, *conclusive*, *decisive*, *confirmed*.

Abundant, *v.* many.

Abuse (F. *abuser* = use amiss, from Lat. *abusus*, —*ab* = from + *uti* = to use).

T. *mislead*, *trick*, *hoodwink*, *curse*, *upbraid*, *scold*.

L. *ill-use*,* *ill-treat*,* *mis-use*, *maltreat*, *deceive*, *de-lude*, *pervert*, *misapply*, *prostitute*, *defile*, *violate*, *vilify*, *revile*, *vituperate*, *insult*, *denounce*, *reproach*, *blame*, *calumniate*.

Accident, *v.* chance.

Account (subst. from O.F. *acounter*=to count up; Lat. *ad* = to + *computāre* = to count).

T. *score*, *reckoning*, *tale*, *sketch* (Dutch), *answer*, *sake*, *behalf*, *ground*.

L. *bill*, *charge*, *statement*, *narrative*, *relation*, *recital*, *report*, *story* (Gk.), *fable*, *legend*, *record*, *history* (Gk.), *chronicle* (Gk.), *journal*, *itinerary*, *memoir*, *description*, *summary*, *list*, *roll*, *value*, *importance*, *rank* (Teut.), *principle*, *motive*, *reason*.

Gk. *biography*, *autobiography*, *epitome*.

Accurate, *v.* exact.

Accuse (F. *accuser*; Lat. *acusāre*, — *ad* = to + *causa* = cause, lawsuit).

L. *tax* (with), *charge*, *cite*, *sue*, *prosecute*, *impeach*, *arraign*, *indite*, *impugn*, *inculpate*, *recriminate*, *reprehend*, *reprimand*, *censure*, *blame*, *reproach*, *denounce*, *decry*, *fulminate*.

Ache, *v.* pain.

Acknowledge (M.E. *a+know-lechen*, from subst. *know-leche*).

T. *own*, *yield*, *fulfil*, *atone*, *thank*, *answer*.

L. *confess*, *admit*, *allow*, *recognise*, *concede*, *grant*, *consent*, *concur*, *endorse*, *accept*, *sign*, *ratify*, *confirm*, *assent*, *comply* (with), *respect*, *defer*,

observe, *compensate*, *reward*, *remunerate*, *recompense*.

Act (F. subst. *acte*; Lat. *actum* = deed, from *agere* = to drive, do).

T. *do*, *work*, *behave*, *ape*, *take off*, *play*.

L. *perform*, *reproduce*, *represent*, *enact*, *personate*, *imitate*, *mimic* (Gk.), *caricature*, *travesty*, *simulate*, *affect*, *feign*, *pretend*.

Actual, *v.* real.

Add (O.F. *adder*; Lat. *addere*, — *ad* = to + *dare* = to give).

T. *heighten*, *deepen*, *widen*, *strengthen*, *hoard*, *reckon*.

L. *affix*, *prefix*, *join*, *annex*, *append*, *augment*, *increase*, *enlarge*, *extend*, *dilate*, *amplify*, *graft*, *count*, *number*, *confirm*, *amass*, *accrue*.

Admire (F. *admirer*; Lat. *admirari*, — *ad* = to + *mirari* = to wonder); *v.* also worship.

T. *wonder*, *look up to*, *think highly of*, *worship*.

L. *regard*, *revere*, *honour*, *pay homage*, *esteem*, *defer* (to), *approve*, *applaud*, *commend*, *prize*, *marvel* (at).

Advise (F. *aviser*, from subst. *avis*; Lat. *ad* = (according) to + *visum* = that which has seemed good).

T. *warn*, *tell*, *enlighten*.

L. *counsel*, *suggest*, *prompt*, *prescribe*, *advocate*, *enjoin*, *exhort*, *charge*, *instruct*, *inform*, *acquaint*, *intimate*, *apprise*, *predict*, *caution*, *admonish*, *expostulate*.

Affair, *v.* business.

Affect, *v.* move, touch.

Afraid, *v.* under fear, coward.

Alive (O.E. *on live* = in life).

T. *living*, *being*, *breathing*, *sound*, *wakeful*, *awake*, *aware*, *ready*, *busy*, *nimble*, *lively*.

L. existing, animated, subsisting, vigilant, alert, acute, sensible, active, eager, vigorous, prompt, vivid.

All (O.E. *all*, *ael*, *eall*).

T. every, the whole, each, full, together.

L. *total*, *integral*, *entire*, *aggregate*, *perfect*, *complete*, *undivided*.*

Allay, *v.* abate.

Allow (F. *allouer*), *v.* give.

Allow (F. *allouer*=to approve; Lat. *allaudāre*=to praise,—*ad*=to + *laudāre*=to praise).

L. permit, suffer, tolerate, endure, admit, sanction.

Ambitious (Lat. *ambitiōsus*, from *ambitio*, lit. a going round, canvassing).

T. longing, yearning, greedy, hungry, bent upon, grasping, keen, wistful.

L. aspiring, soaring, desirous, covetous, vaulting, ardent, avid, eager, solicitous, intent, proud, vain, dissatisfied, discontented.

Amuse (F. *amuser*=lit. to make one stare,—*a*=to + *muser*=to gape, sniff the air).

T. while away, gladden, enliven, tickle.

L. please, charm, delight, captivate, gratify, humour, indulge, regale, entertain, divert, beguile (Teut.), cheer, rejoice, solace, delude.

Anger (Scand. *anгр*=grief).

T. wrath, bitterness, soreness, warmth, heat, heart-burning.

L. choler, rage, displeasure, indignation, resentment, annoyance, vexation, irritation, irritability, irascibility, exasperation, acerbity, asperity, virulence, acrimony, animosity, ire, enmity, rancour, fury, frenzy (Gk.), passion.

excitement, chagrin, pique, umbrage.

Anger (verb from above).

T. fret, ruffle, stir, nettle, embitter.

L. chafe, hurt, annoy, offend, irritate, vex, aggravate, incense, exasperate, excite, provoke, affront, enrage, infuriate, inflame.

Angry, *v.* above.

Annoy, *v.* anger, worry.

Answer (O.E. *andswerian*,—and = against + *swerian* = to swear, speak).

T. fulfil, match, meet, fit, do.

L. reply, respond, rejoin, confute, refute, parry, riposte, explain, solve, satisfy, suit, pay, succeed.

Approve, *v.* like, praise.

Ask (O.E. *acsian*, *ascian*).

T. seek, beseech, crave, bid.

L. enquire, ply with questions, question, query, interrogate, cross-examine, catechise (Gk.), press, pray, conjure, plead, entreat, beg, appeal, importune, sue, request, demand, order, require, command, claim, implore, adjure, petition, solicit, invite, supplicate, invoke, imprecate, challenge.

Astonish, astound (O.F. *estoner*; M.E. *astonien*; Lat. *extonāre*=lit. to thunder out of one's senses,—*ex*=out of + *tonāre*=to thunder).

T. amaze, bewilder, startle, daze, dazzle, stun, stagger, take one's breath away, strike (dumb), awe.

L. surprise, confound, perplex, stupefy, petrify (Gk.), electrify (Gk.).

Attack (F. *attaquer*; Ital. *attaccare*=to attach, attack); *v.* also fight.

L. assail, assault, encounter,

invade, accuse, impugn, impute, rail (at), satirise, calumniate, criticise (Gk.).

Attention (Lat. *attentionem*, acc. of *attentio*, from *attendere* = to stretch towards, — *ad* = to + *tendere* = to stretch).

T. heed, care, mind, thought, mindfulness, watchfulness, wariness.

L. *intentness*, observation, study, scrutiny, inspection, vigilance, zeal (Gk.), assiduity, diligence, application, concentration, management, *circumspection*, caution, prudence, deliberation, contemplation, observation, reflection, *consideration*, notice, respect, regard, deference, observance.

B

Bad (M.E. *badde*, from O.E. *baeddel* = hermaphrodite).

T. *ill*, weak, ailing, sickly, unhealthy, unfit, unsound, *worthless*, mean, low-minded, dirty, foul, *evil*, sinful, naughty, harmful, *wrong*, unfair, knavish, *wicked*, fiendish, *threatening*, gloomy, untoward.
